PINbox

Your end-to-end last mile delivery software, ready to connect with any eCommerce platform.

A — Do you have your own eCommerce?

- WooCommerce, Magento, Shopify ... you name it.

- Good news – **PINbox** speaks all their languages and can seamlessly connect with either one of them.

- You are adding a Last Mile Delivery option on the fly: have a dispatch, manage your delivery orders and your own fleet of drivers, without bearing the complexity of custom software development or integrations.

- Stay focused on growing your customer base and delivery team – **PINbox** does the rest.

B — You are just starting with eCommerce?

- Starting small never hurts but ... starting smart might be just easier.

- **PINbox** recommends a friendly, simple to use eCommerce platform ready to go, from our friends at Shopify.
  Why Shopify? Because they are truly the champions of small business and **PINbox** loves helping small businesses!

- Upload your Logo, add few products in the inventory, enroll your first driver in the system and voila ... you are ready to offer home delivery to your first customers.

- **PINbox** integrates natively with Shopify so you can instantly reap the benefits of eCommerce & Home Delivery.

Why bother to do my own deliveries and not use DoorDash or UberEats?

Eliminate their fees (20%-30% from your revenue).

You are doing all the work, you are to keep all the profit.

Because you do care for your Customers.
Own them once and service them forever without extra cost.

Built with your Drivers in mind

Ready to deliver multiple customer orders on the same route? No problem.
See real-time updates for any order and eventually get an extra incentive when the tips are piling up? Sure do, right in the app.

PINbox has a simple yet powerful mobile app - the only tool your Drivers need to get the job done.

Automatic Dispatch

PINbox's dispatch engine will automatically select the best Driver from the fleet, based on time to deliver, location and cost.
Is this Driver not available right away? No worries, we give it a second... and a third chance... automatically.

If needed, you can switch anytime to manual dispatch (both drivers and consumers are human beings so are we).

Are you working in a heavily regulated industry?

We've been battle tested in tobacco and cannabis industries, so we do embrace tough regulatory standards ensuring traceable path through the process.
Multiple checkpoints along the way ensure the driver collects the right order and deliver exactly to the right customer.
QR code handshake on mobile device and ID Verification becomes a powerful Proof of Delivery for any parcel.

In the end, it is all about a great Customer Experience

You deliver in 30 minutes or next day – either way, keep your customers informed with real-time updates and notifications.
Do they need extra-options? Your driver needs to call or text for instructions? Everything's happening directly in the app, one touch away.

Every experience can be memorable or can be a learning; both are accommodated, thanks to the integrated feedback function.

Where can you use PINbox?

Restaurant	Fast Food	Bakery	Coffee Shop	Florist	Grocery Store
